Multiband Cellular Magnetic Mount Antenna

18/07/2013 v1

MAR-C3G

No hole installation

Omni directional coverage

Covers global 2G/3G frequencies

If you are constantly on the move the magnetic MAR antenna range is the ultimate solution. Placed on the roof of a vehicle the antenna will grip securely with a tough but removable magnetic base, giving you omni-directional coverage.

When it comes to removing or re-positioning, it couldn't be easier and you won't be left with any evidence that the antenna was there at all. With the MAR range you no longer need to make holes in your vehicle to fill holes in your coverage.
